*After all pediatric visits and core vaccines are completed at West Loop Veterinary Care, your kitten will be eligible for a spay or neuter at West Loop with a discounted rate.**

Spay & Neuter Procedures

Generally, the best age for spaying your pet is at six to eight months of age; neutering can be done anywhere from six months to one year. The first heat cycle in a female pet usually occurs around this time. Spaying your pet before her first heat cycle reduces the risk of breast cancer. Neutering your pet prevents many undesirable behavior patterns. Spay or Neuter procedures at West Loop Veterinary Care include the following:

- Pre-anesthetic Bloodwork
- Monitoring
- Complete Medications
- Experienced Veterinary Technicians
- Therapeutic Cold Laser Treatment
- Individualized Care
- Vessel-Sealing Technology
- Complimentary Post-Op Visits

** After completion of pediatric visits and core vaccines, your kitten is eligible for the following: \$175 Neuter or \$250 Spay (does not include microchip or other services).*
